

**2011 REVISED SUBDIVISION ORDINANCE
OF
LINCOLN COUNTY, SOUTH DAKOTA**

PREPARED BY LINCOLN COUNTY PLANNING COMMISSION
UNDER AUTHORITY OF SDCL CHAPTER 11-2

ADOPTED BY ORDINANCE OF
LINCOLN COUNTY BOARD OF COUNTY COMMISSIONERS
DATE: April 26, 2011
PUBLISHED: May 12, 2011 & May 19, 2011
EFFECTIVE DATE: June 8, 2011

Ordinance No. 11-04-63

Updated with Amendments as of September 1, 2020

ARTICLE 13: DEFINITIONS.....25

ARTICLE 1: GENERAL PROVISIONS

Section 101. Title

These regulations shall be referred to as the 2011 Revised Subdivision Ordinance of Lincoln County, South Dakota.

Section 102. Purpose

It is the purpose of these regulations to govern the subdivision of land so as to provide for coordination of roads in other subdivisions and transportation plans; to set aside adequate areas for public uses, water and sewer facilities, drainage and flood control; to foster efficient and orderly growth compatible with the natural environment; to prevent premature land subdivision; to protect and provide for the public health, safety, and general welfare; and to conform with other plans and regulations.

Section 103. Jurisdiction

These subdivision regulations shall apply to all subdivisions of land, as described herein, located within the unincorporated area of Lincoln County outside any municipal jurisdiction as set forth under SDCL 11-6-26.

Section 104. Conformity

In addition to the requirements established herein, all subdivision plans and plats shall comply with the following plans and regulations:

- A. The Comprehensive Plan for the County and the policies set forth therein.
- B. The Zoning Regulations, as amended or revised.
- C. The Official Zoning Map, as amended or revised.
- D. Flood Damage Protection Ordinance, as amended or revised.
- E. Other plans and regulations, such as any nuisance ordinance.

Section 105. Interpretation

These regulations are the minimum requirements for the promotion of public safety, health, and general welfare. It is not the intent of these regulations to repeal, abrogate or impair any existing easement, covenant, or deed restriction, where these provisions conflict or overlap. Whichever imposes the more stringent restrictions shall prevail.

Section 106. Amendments

Any provisions of these regulations may from time to time be amended, supplemented, changed, modified or repealed by the Board of County Commissioners according to law; however, such amendments, supplements, changes or modifications shall not become effective until after study and recommendation by the Planning Commission and final approval by the Board of County Commissioners as follows:

___ Proposed change(s) in Subdivision Regulations drafted and sent to State's Attorney for review;

- ___ Letter received from State’s Attorney confirming legality of proposed change(s);
- ___ Planning Commission holds a public hearing on the proposed change(s) with notice to be published in the County’s official newspaper at least 10 days prior to the scheduled date of the public hearing;
- ___ Planning Commission recommends adoption of the proposed change(s) to the Board of County Commissioners;
- ___ Board of County Commissioners holds a public hearing on the proposed change(s) with notice to be published in the County’s official newspapers at least 10 days prior to the scheduled date of the public hearing;
- ___ First reading of ordinance changing the regulations held;
- ___ Second reading and adoption of the ordinance changing the regulations held;
- ___ Notice of adoption published; and
- ___ Revised Subdivision Regulations become effective 20 days after publishing the notice of adoption, unless the referendum is invoked.

Section 107. Enforcement, Violations and Penalties

- A. The Planning Director is hereby authorized and directed to enforce all the provisions of these regulations and establish rules for its administration. For such purposes, the Planning Director shall have the powers of a law enforcement officer. Any appropriate actions may be taken by law or in equity to prevent any violation thereof, to prevent unlawful construction, to recover damages, to correct or abate a violation, or to prevent illegal occupancy of a building, structure, or premises. These remedies shall be in addition to the penalties described in Section 107(C)
- B. No owner, or developer of any parcel of land located in a proposed subdivision shall transfer or sell any part of the parcel before a final plat of the subdivision has been approved in accordance with the provisions of the regulations and filed with the Lincoln County Register of Deeds unless provisions of plat exemptions apply as within (Section 204) Subdivision Plan Exemptions - Minor Plat.
- C. Any person violating any provisions of these regulations shall be punishable by a fine not to exceed the fine established by SDCL 22-6-2(2), by imprisonment not exceeding thirty days, or by both fine and imprisonment. Each day in which a violation of these regulations continues shall constitute a separate offense.
- D. Whenever any work is done contrary to the provisions of these regulations, the Planning Director may order the work stopped by notice in writing served on any persons engaged in the doing or causing such work to be done; and any such persons shall forthwith stop such work until authorized by the Planning Director to proceed with work.
- E. The Planning Director shall have the authority to make interpretations of these regulations and to adopt and enforce rules and supplemental regulations in order to clarify the application of its provisions.

- F. No zoning permit or building permit shall be issued for the demolition or construction of any building or structure located on a lot or parcel subdivided or sold in violation of the provisions of these regulations. The authority to deny such a permit shall apply whether the applicant was the owner of record at the time of such violation or is the current owner of record or a vendee of the current owner pursuant to a contract of sale with, or without, actual or constructive knowledge of the violations at the time of acquisition of interest in said real property.

ARTICLE 2: SUBDIVISION PLAN APPROVAL PROCESS

Section 201. Applicability

Subdivision of land shall be required before the division of land (for any purpose) into two or more parcels.

Section 202. Overview of Approval Process

Proposed subdivision development plans must be approved by the County in accordance with the following procedures which include three principal steps.

Step 1:		Concept Plan (<i>with an annexation petition or in preparation for preliminary subdivision plan</i>)
	Review by	Planning Director and County Floodplain Administrator
	Approval by	None

Step 2:		Preliminary Plan (<i>in coordination with rezoning</i>)
	Review by	Planning Director, County Floodplain Administrator, GIS Coordinator and Highway Superintendent
	Approval by	Planning Commission and Board of County Commissioners

Step 3:		Final Plan and the Plat (<i>before a building permit is approved</i>)
	Approval by	Planning Director

Section 203. Filing Fee

A schedule of fees, charges, and expenses for matters pertaining to these Subdivision Regulations shall be established by resolution of the Board of County Commissioners. The current fee schedule shall be available from the Planning Director of Lincoln County. All fees shall be the property of the County and shall be paid over to the Planning Director of Lincoln County for credit to the General Fund of the County which under no condition shall be refunded. Until all applicable fees, charges, and expenses have been paid in full, no action shall be taken on any application or appeal.

Section 204. Subdivision Plan Exemptions - Minor Plat

The purpose of this section is to provide for the timely review of minor plats and replats (including plats for transfer of ownership) that do not discernibly impact surrounding properties, environmental resources, or public facilities. No concept plan, preliminary plan, or final plans are required. Minor plats and replats are administratively approved by the Planning Director and must comply with all requirements of a plat in Section 502 (The Plat).

A. Minor Plats Requirements.

1. A minor plat is a plat containing not more than three lots fronting on an existing road and meet ALL OF the following requirements:
 - a. Does not require the dedication of right-of-way or construction of new roads;
 - b. Does not require the creation of easements;
 - c. Does not create a lot or tract eligible for any public or private improvements other than sidewalks;
 - d. Does not landlock or otherwise impair convenient ingress or egress to or from the rear side of the subject tract or any adjacent property;
 - e. Does not change the grades from the grading plan which was submitted and approved with the original plat or, if the grades are going to be changed, then a grading plan shall be submitted and approved for the minor plat or replat;
 - f. Does not significantly change any plans that have been prepared for the placement of any other utilities in the subdivision;
 - g. Does not adversely affect the remainder of the parcel or adjoining property; and
 - h. Does not conflict with any provision or portion of the comprehensive plan, official map, zoning ordinance, or these regulations.
2. Replat. A replat includes all the requirements of a minor plat and shall also include the minor vacation of existing platted lines to achieve either a reconfiguration of the existing recorded plat or change the number of recorded lots in the subdivision only where the perimeter of the tract being replatted is not altered by the replat. Also, a replat shall certify that the platting vacates the existing plat.

ARTICLE 3: CONCEPT PLAN

Section 301. Submission

A concept plan is a process designed to help a developer save time and expense in preparing a preliminary plan and a plat. The advantage of a concept plan is that County staff will provide important information upfront that may significantly affect the development. It is recommended that at least some preliminary drainage engineering be completed during the concept plan stage. All concept plans for review shall be submitted to the Planning Director.

- A. Prior to the submission of the preliminary subdivision plan and, if needed, rezoning to the Planning Commission, the developer shall submit a concept plan to the Planning Director. County staff comments on the concept plan shall be sent to the developer within 15 working days. The requirement for a concept plan may be waived by the Planning Director. A developer may choose to submit a concept plan for comments that has all elements of a preliminary subdivision plan.
- B. The concept plan shall contain the following information:

1.	The general layout of roads; reservations of land; road improvements, drainage, floodplain; availability of services; and agreement with the County's comprehensive plan goals and policies.
2.	The owner and developer addresses and telephone numbers.
3.	Vicinity map to scale, showing locations of the concept plan and other property for at least 660 feet in every direction.

ARTICLE 4: PRELIMINARY PLAN

Section 401. Submission

Whenever a preliminary plan is proposed, the developer shall prepare such plan at a scale of 100 feet to an inch, or 200 feet to an inch, on sheets 15 by 26 inches or 22 by 34 inches in size. Three copies of the preliminary plan shall be filed with the Planning Department.

A. The preliminary plan shall contain the following information:

1.	The name of the proposed subdivision and location by quarter section, section, township and range. Subdivision names shall not duplicate or be alike in pronunciation with any existing subdivision, unless it is an extension of or adjoining an existing subdivision. All subdivision names shall be approved by the Planning Director.
2.	The names of all adjacent subdivisions and their platting pattern. Adjoining unplatted land shall be labeled as such.
3.	The correct legal description. Notations stating acreage, scale, and north arrow.
4.	The owner, developer, and surveyor's names and telephone numbers.
5.	Vicinity map, showing locations of the preliminary plan and surrounding property for at least one mile in every direction.
6.	Exterior boundaries of the proposed subdivision referenced to a corner marker of the U.S. Public Land Survey, and the total acreage encompassed thereby.
7.	The location and width of all proposed road rights-of-way, existing structures, easements, railroad rights-of-way, streams and water courses, lakes, wetlands, rock outcroppings, wooded areas, and other similar significant features.
8.	The boundary lines of the floodway and 100-year flood zones, along with the base flood elevation on each lot as delineated on the Flood Insurance Rate Maps (FIRM) or as amended by Letter of Map Revision (LOMR).
9.	Existing contours at vertical intervals not greater than five feet. A lesser interval may be required in those cases where the character or topography of the land is difficult to determine.
10.	A systematic lot and block numbering pattern, lot lines, setbacks and road names.
11.	Approximate dimensions and acreage of all lots.
12.	Location of all existing roads abutting or serving the proposed subdivision, an estimate of the vehicular traffic to be created by full development of the subdivision, a statement regarding the effect thereof on such roads, and the nature of all improvements as may be required for such roads to properly serve the proposed subdivision.
13.	Certificate of approval for endorsement by the Planning Commission.

B. The following plans, documents or instruments shall be submitted with the preliminary plan:

1.	<u>Preliminary Drainage and Grading.</u> The existing drainage pattern for the area shown along with any proposed cut and fill operations which would alter the existing drainage patterns.
2.	<u>Erosion Control.</u> In any proposed subdivision in which an area greater than five acres will be disturbed, or in areas where topographic features are such that erosion, siltation or temporary runoff problems may occur, a site plan shall be required showing how these problems will be resolved.
3.	<u>Covenants.</u> Proposed covenants to run with the land providing restrictions or other limitations on land use or development within the subdivision, including road maintenance agreement for all roads not accepted by a governmental entity within the subdivision.
4.	<u>Agreements.</u> Proposed agreements between the developer and township outlining the assumed or agreed responsibility of the developer to undertake directly, or to pay or reimburse the township for cost of improvements to roads, bridges, culverts, drainage ways, etc.

Section 402. Approval of Preliminary Plan

Based on the comments from the concept plan, the developer shall submit the preliminary subdivision plan to the Planning Director. The application may be submitted five working days before the Planning Commission submittal deadline.

1. Within five working days of receipt of a subdivision application and fee, the Planning Director will review the application to determine whether it contains all elements required by Section 401 (A).
2. If the Planning Director determines that the application does not contain all elements as required by Section 401 (A), then the applicant shall be notified in writing of the specific deficiencies; and that the application shall not be scheduled for a public hearing until all elements of the application are submitted. The applicant has until the submittal deadline to submit all elements.
3. When the Planning Director determines that the application does contain all elements as required by Section 401 (A), the application shall be scheduled for a Planning Commission public hearing by the Planning and Zoning Director on a day when the Planning Commission is regularly scheduled to meet as determined by the rules, policies, and regulations as adopted or which may hereafter be adopted by the Planning Commission for holding public hearings on such requests.
4. The Planning Director will review within ten days to determine compliance with all approval criteria of Section 401 (A).
5. If the Planning Director determines that the preliminary subdivision plans do not meet the criteria, a one-month deferral of the plan may occur and the Planning Director shall identify specific required information in its notification to the applicant at the end of the ten-day review period. After the one-month deferral and a resubmitted preliminary subdivision plan, the Planning Director may schedule the preliminary plan for a Planning Commission public hearing.

6. If the Planning Director determines that the preliminary subdivision application is insufficient compliance with Section 401 (A), but there are specific design, improvement, or other compliance deficiencies, the Planning Director may list conditions to the approval of the subdivision application to the Planning Commission.

The Board of County Commissioners, in taking action on a preliminary plan, shall consider the recommendations of the Planning Commission and shall hold a public hearing at a regularly scheduled meeting. It shall then approve, disapprove, or approve with conditions based upon the criteria within Section 401 (A). Approval of the preliminary plan shall indicate the Board of County Commissioners' approval of the general location of the lots, blocks, and streets including the interrelationship to proposed zoning districts or land uses; all which shall be so noted on the preliminary subdivision plan's certificate of approval. The approved plan shall be kept on file in the office of the Planning Director. Any conditions included by the Board of County Commissioners shall be resolved on a revised preliminary plan which would be submitted to the Planning Director for administrative approval before any development engineering plans and plats are submitted.

Section 403. Effective Period of Preliminary Plan Approval

The approval of a preliminary plan shall be effective for a period of three years, at the end of which time approval of the subdivision plat or a portion thereof must have been obtained from the Board of County Commissioners. Any plan which has not received approval for all or a portion in that time shall be null and void and the developer shall be required to resubmit a preliminary plan for approval subject to any new subdivision regulations.

Upon written request to the Planning Director and prior to the Preliminary Plan expiration date, a one-year time extension for the Preliminary Plan may be granted by the Planning Director, subject to the following condition:

The land uses for land within the preliminary subdivision plan area have not significantly been altered since the original approval date for the preliminary subdivision plan.

Section 404. Revisions to Preliminary Plan

Minor amendments to an approved preliminary plan may be made at the discretion of the Planning Director and Highway Superintendent.

ARTICLE 5: FINAL PLANS AND THE PLAT

Section 501. Final Plans

Following the approval of the preliminary plan, if the developer wishes to proceed, three copies of final drainage, grading, and utility plans shall be submitted to the Planning Director for review and approval. Any or all of these plans may be deleted at the Planning Director’s discretion.

- A. Grading Plan. The grading plan shall show existing and proposed contours with intervals acceptable to the County Engineer. The site grading plan shall show drainage arrows for each lot and lot corner elevations. The plan shall also show the right-of-way width for all proposed roads. Construction documents indicating road grades and alignment using Lincoln County and industry accepted standards shall be prepared.

- B. Drainage Plan. When deemed necessary, the drainage plan shall show proposed drainageways and drainage facilities. The plan shall make a determination of approximate watershed boundaries and land use to be used in estimating runoff potentials. Drainage facilities shall be designed to handle the determined flow volumes. Pipe sizes, inlet sizes, and inlet locations based on industry accepted standards for accepted storm frequency and inundation levels shall be illustrated in the drainage plan. Detailed construction plans showing pipe size, slopes, inlet types and size, including the profile of the storm sewer with rim and invert elevations shall be prepared.

- C. Utility Plan. The utility plan shall include utility systems for the development. All utility plans shall conform to industry accepted standards. Detailed construction drawings with stationing, plan and profile section for all water and sanitary sewer layouts shall be prepared.

Section 502. The Plat

One signed mylar plat, two paper copies, one reduced 8.5 x 11 copy and an electronic PDF and DWG shall be submitted to the Planning Director for review and approval. If the plat is not approved by the Planning Director within ten (10) days of submittal, the plat shall be presented to the Board of County Commissioners for action. If more than two sheets are required, an index sheet of the same dimension shall be attached and filed. No work shall be done on the subdivision including the making of any road improvements or installation of any utilities, and no lots sold before the final plat is approved and recorded. The plat shall contain the following information:

A.	The name of the proposed subdivision and location by quarter section, section, township and range. Subdivision names shall not duplicate, be the same spelling, or alike in pronunciation with any existing subdivision located in the same section, unless it is an extension of or adjoining an existing subdivision. Each plat shall be titled as follows: <u>(Name)</u> Addition in the quarter, Section , T N, R W of the 5th P.M., Lincoln County, South Dakota.
B.	Scale and north arrow.
C.	The names of all adjacent subdivisions, all lot and block lines, type of easements, and rights-of-way.
D.	A systematic lot and block numbering pattern, lot lines and road names, and the square footage or

	acreage of all lots.
E.	The location and width of all proposed and existing rights-of-way, easements and private roadways.
F.	The boundary lines of the area being subdivided with accurate angles or bearings and distances tying the perimeter boundaries to the nearest established street line, section corner, other previously described subdivision, or other recognized permanent monuments which shall be accurately described on the plat as required by SDCL 43-18, 43-20 and 43-21.
G.	Location of all monuments and permanent control points, and all survey pins, either set or located as required by SDCL 43-18, 43-20 and 43-21.
H.	The location and description of any portions of the property intended to be dedicated or granted for public use.
I.	All dimensions, both linear and angular, necessary for locating the boundaries of the subdivision lots, roads, easements and type of easement, and any other areas for public or private use. Linear dimensions are to be given to the nearest 1/100 of a foot.
J.	The radii, chords, length of curve, points of tangency, and central angles for all curvilinear roads and radii for rounded corners.
K.	The boundary lines of the floodway and 100-year flood zones, along with the base flood elevation on each lot as delineated on the Flood Insurance Rate Maps (FIRM) or as amended by Letter of Map Revision (LOMR).
L.	Acknowledgment of the owner or owners of the plat of any restrictions, including dedication to public use of all roads, alleys, parks, or other open spaces shown thereon and the granting of easements required.
M.	All formal irrevocable offers of dedication for all roads and other uses as required.
N.	Protective covenants or deed restrictions shall be filed with the County Register of Deeds.
O.	Certificates as specified in Article Twelve.
P.	Approved assurance agreement(s).

ARTICLE 6: PLAT VACATIONS

Section 601. Vacation of Plats

Any plat or any part of a plat intended to be vacated shall be governed by the requirements of SDCL Ch. 11-3.

ARTICLE 7: LOTS AND BLOCKS

Section 701. Blocks

The length, width and shape of blocks shall be determined with regard to provision of adequate building sites suitable to the needs of the use contemplated; the need for convenient access, circulation, and safety of traffic; and topographic conditions.

Block lengths shall generally not exceed 1300 feet in length and shall be normally wide enough to provide for two tiers of lots of an appropriate depth.

Section 702. Lots

- A. Lot arrangement shall be such that there will be no foreseeable difficulties, for reasons of topography or other conditions, in securing permits to build on all lots in compliance with the zoning regulations.
- B. The minimum lot width required by the zoning regulations shall be measured along the building setback line.
- C. Corner lots for residential use shall have extra width to permit adequate building setbacks from both roads.
- D. All interior lot lines shall be a straight line or a series of straight lines. Curved interior lot lines shall be prohibited.
- E. Side lot lines shall be at right angles to roads except on curves where they are radial, or when otherwise approved.
- F. Double frontage and reverse frontage lots shall be avoided except where essential to separate a development from traffic arteries, or to overcome specific disadvantages of topography and orientation. Driveways for such lots shall have access only to an interior subdivision road. Where double frontage lots are used, an extra lot depth or width shall be required to provide for an extra setback to offset the impact of higher traffic volumes.
- G. Plats for residential development adjacent to functioning railroad rights-of-way shall provide additional lot depth or width to provide for sufficient setback to offset the impact of the railroad traffic.
- H. Each lot shall abut a dedicated right-of-way, mutual access, common area or private street. Private streets or roads shall be indicated on the Development Engineering Plan as a private roadway easement and shall not be included as part of any required lot area or setback.
- I. Minimum lot size required by the zoning regulations shall not include any public right-of-way or private roadway easement.

ARTICLE 8: MINIMUM ROAD IMPROVEMENTS AND DESIGN STANDARDS

Section 801. Road Arrangement and Design

	A.	Roads shall be related to topography and arranged so building sites are at or above road grade.
	B.	Roads shall be properly integrated with the existing system of roads, including connecting adjacent subdivisions where topographical and land use considerations permit.
	C.	Roads shall extend to subdivision boundary lines, unless prevented by topography or other physical conditions.
	D.	Roads shall be arranged to allow access to future subdivisions on abutting land.
	E.	All subdivision roads shall be permanently dedicated as public rights-of-way or shown as private roadways. For the dedication of public right-of-way, the plat shall include a certificate for township acceptance of the road dedication or the owner's certificate shall describe the legal responsibilities for construction, repair and maintenance of said roads (see Section 12.02).
	F.	Where a subdivision abuts or contains an existing or proposed arterial road, the following may be required: frontage roads, reverse frontage lots with screen planting along the rear property line, or other such treatment as may be necessary for adequate protection of residential properties.
	G.	Subdivisions platted along existing roads shall dedicate additional right-of-way if necessary to meet minimum road width requirements.
	H.	Road jogs with center line offsets of less than 125 feet shall not be made.
	I.	Dead end roads as permanent features shall be prohibited.
	J.	Roads subject to inundation or flooding shall not be approved unless essential for unusual circumstances which exist. Where flooding appears possible, road profiles and elevations shall be required in order to determine the advisability of approving the proposed subdivision.
	K.	The road layout of the proposed subdivision shall provide for the continuation or projection of roads already existing in areas adjacent to the area being subdivided. In addition, roads in the proposed subdivision shall correspond in name, direction and width to existing roads and shall be in conformance with the Major Street Plan and Comprehensive Plan as adopted.
	L.	Intersections:
	1.	Acute angles are to be avoided if possible, but no angle of less than 80 degrees shall be permitted.

2.	Not more than two roads shall intersect at one point unless specifically approved.
3.	Intersection offsets of less than 250 feet shall be avoided.

Section 802. Minimum Road Right-of-Way

A.	Roads shall have a minimum publicly dedicated right-of-way of 66 feet. An easement of 66 feet shall be reserved for private roadways. A maximum right-of-way of 100 feet may be required on any roads designated as arterial and collector.
B.	Cul-de-sacs are not encouraged but will be allowed where, due to physical constraints, they are necessary for the reasonable development of the subdivision. The minimum right-of-way radius of turnarounds and eyebrows at the end of a cul-de-sac shall be 55 feet and the length of the road shall be limited to 500 feet. This shall also apply to private roadways.

(Amended: Ordinance No. 1806-38, 06-26-18)

Section 803. Road Construction

A.	Access from individual lots within a subdivision onto an arterial road shall be prohibited. Frontage roads are not encouraged but may be considered when special circumstances exist.
B.	Driveway spacing and sight distance requirements shall be in accordance with SDDOT standards.
C.	Minimum width of paved surface shall be 24 feet of 4/8 asphalt paving/base and two-foot gravel shoulders. Ditches shall have a maximum 4:1 side slope. Additional lanes may be required for higher traffic roadways as determined by the County Engineer. Minimum paved surface radius within a cul-de-sac shall be 30 feet, plus a two-foot gravel shoulder.
D.	At a minimum, there shall be an eight (8) inch granular base course with a four (4) inch asphalt surface for a residential development and a twelve (12) inch granular base course with a four (4) inch thickness of asphalt for a commercial or industrial development. Alternative surface standards may be approved with a submitted professional engineering report.
E.	Culverts under roadways and driveways shall be Reinforced Concrete Pipe, Class II, or higher as needed. Flared or sloped end sections are required on all culverts within the road right-of-way. Minimum driveway culvert size is 18-inch.
F.	The size of culverts shall be determined by a drainage study for the affected watershed area.
G.	A cross slope (crown) shall be provided on all roads at a rate of .03 feet per foot.
H.	The road ditch depth shall accommodate drainage volumes, but shall be at least 2 ½ feet below the road grade. Alternative ditch depths may be approved where warranted.
I.	Seeding of ditches and other erosion protection measures shall be employed after grading is completed to minimize erosion.

J.	Private roadways shall be indicated on the plat and shall not be included as part of any required lot area or setback.
K.	Any private roadway approved by the County shall provide permanent unobstructed access to the area it serves. The erecting of any structure within the private roadway easement which would in any way interfere with the use of such private roadway by the public or any governmental agency will not be permitted.
L.	Any plat presented for approval which shows a private roadway as a means of access shall provide language in the Owner's Certificate in accordance with Section 1202 reserving the private road for permanent unobstructed access to abutting property and establishing private responsibility for maintenance of the roads.
M.	Road standards for commercial or industrial developments may be increased by the Planning Director and Highway Superintendent. An increase of these standards will be based on relevant information such as a municipality's comprehensive plan or subdivision regulations, driveway access widths, speed limit, number and types of vehicles using the road, parking availability, sound engineering judgment and any other pertinent information.
N.	In order to maintain consistent signage throughout the County, sign type and locations shall be included with the final subdivision plans. Signs shall be installed in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) as amended by County specifications.

(Amended: Ordinance No. 1806-38, 06-26-18)

Section 804. Road Names

- A. Roads in alignment with existing roads shall bear the names of those roads.
- B. No road names shall be used which duplicate or are like in pronunciation with any other existing roads. Road names shall not exceed 14 characters, including spaces. Except as may be otherwise required, road name suffixes shall be applied as follows:
 - 1. *Street* - a road generally running east and west
 - 2. *Avenue* - a road generally running north and south
 - 3. *Road* - a road running both east and west or north and south for significant lengths; the names may only be assigned to major rights-of-way
 - 4. *Lane* - a road running northeast to southwest
 - 5. *Drive* - a road running northwest to southeast
 - 6. *Trail* - a road which wanders in different directions
 - 7. *Circle* - all cul-de-sacs
 - 8. *Court* - a road with two openings which enters and exits on the same road
 - 9. *Place* - all private roads

(Amended: Ordinance No. 1806-38, 06-26-18)

ARTICLE 9: GRADING AND DRAINAGE

Section 901. Grading Plan

The plan shall include the following information:

- A. *Final Site Grading Plan:* The grading plans shall show the existing and proposed contours with intervals of one (1) foot, or as needed to depict the topography adequately. The site grading plan shall also include the drainage arrows for each lot. Builder/Owner is responsible for final grading being compliant with county approved grading plan.
- B. *Final Road Grading Plan:* The road grading plan shall show percent slope for all proposed roads, drainage arrows, and location and size of culverts. Plan, profile, and cross sections (at 50-foot intervals and all culvert locations) shall be provided. Builder/Owner is responsible for final grading being compliant with county approved grading plan.

(Amended: Ordinance No. 1806-38, 06-26-18; Ordinance No. 2009-25, 09-01-20)

Section 902. Drainage Plan

All drainage facilities, including on-site detention, drainageways, detention ponds and drainage channels shall be shown on the drainage plan. The developer is required to expand the drainage plan to include other properties within the drainage basin when the potential exists for impact beyond the development area, both upstream and downstream. The plan shall provide the following information:

- A. Existing and proposed contour lines and the surface water drainage system, including any major alteration of the existing drainage pattern. The contour interval shall be of such detail that the final drainage pattern is adequately illustrated.
- B. A natural or established watercourse requires a minimum of a forty (40) foot easement.
- C. The 5-, 25-, and 100-year storm event for predevelopment conditions and post development conditions shall be shown. The post development flow rate from the subdivision shall not exceed pre-developed flow rates from any location as reviewed and approved by the county.
- D. Detention ponds and outlet control structures shall be sized to mitigate increases in the flowrate for the 5-, 25-, and 100-year storm occurrence. Detention shall be calculated using a method approved by the County and detention storage shall begin at an elevation equal to or above i) the discharge location ground elevation, ii) flood plain, iii) wetland elevation, iv) top of bank, or v) other elevation as determined by the County. Driveway culverts shall be designed for the 5-year storm occurrence. Any driveway culverts that exceed the minimum size of 18 inches shall be constructed by the developer along with the road improvements. Roadway culverts, drainageways, and road ditches should generally be designed for the 25-year storm occurrence.
- E. The boundaries of all drainage easements and detention ponds. A maintenance agreement for the upkeep of all drainage facilities, including on-site detention, drainageways, detention ponds and drainage channels, and natural or established watercourses shall be

filed with the plat.

- F. Individual lot drainage shall be coordinated with the general surface drainage pattern for the area. Drainage shall be designed so as to avoid a concentration of storm drainage water from each lot to adjacent lots. Concentrated flows from the subdivision shall only occur at locations where concentrated flows previously existed.
- G. It shall be the responsibility of each lot owner to install and maintain a culvert under the driveway, unless installed by the developer, when lot development commences.
- H. Discharge or concentrated flows onto adjacent properties shall be located generally at existing drainage conveyance locations and will be reviewed and approved with final development plans. Applicant shall provide written permission from adjacent landowner, drainage easement, or energy dissipation methods as reviewed and approved by the County.

(Amended: Ordinance No. 1806-38, 06-26-18; Ordinance No. 2009-25, 09-01-20)

ARTICLE 10: EROSION CONTROL PLAN

Section 1001. Specifications

Measures used to control erosion on a development site shall, as a minimum, meet the standards and specifications of the Lincoln County Conservation District. Stripping of vegetation, regrading and cut and fill operations should be kept to a minimum, as should the amount of land and the duration of exposure. Whenever feasible, development plans should be made in conformance with topography in order to create the least erosion potential. Similarly, as much as possible natural vegetation shall be retained, protected and supplemented. The Planning Director, with assistance of the Conservation District, shall require any further measures as necessary to prevent erosion on building sites and developments from depositing wastes or sediments on roads or other property. Every effort shall be made to retain the natural vegetation on all ditches and drainageways. Ditches and drainageways will not be disturbed without the approval of the Planning Director and County Floodplain Administrator. Erosion control plans shall show:

- A. All proposed land disturbance including areas of excavation, grading, filling, removal, or destruction of topsoil and spreading of earth material.
- B. Provisions for erosion control during construction. Such provisions shall include the sequence of the operations listed above, with an estimated time of exposure. The proposed temporary measures to control erosion will be designed to withstand the two year rain and be shown on the plan.

Section 1002. Existing Features

Existing natural features which would add value to the development or to the county as a whole, such as trees, water courses, historical and/or scenic sites, and similar irreplaceable assets, shall be preserved in the design of the subdivision.

ARTICLE 11: ASSURANCES FOR COMPLETION OF MINIMUM IMPROVEMENTS

Section 1101. Assurances for Subdivisions

No plat of any subdivision shall be approved unless the improvement(s) required by this ordinance have been installed prior to such approval, or unless the developer shall have posted a surety bond or irrevocable letter of credit or acceptable cash deposit assuring completion of all required improvements.

No building permits shall be issued until assurances have been filed or all required road improvements have been completed.

Section 1102. Maintenance Agreements

Where the subdivision contains sewers, sewage treatment plants, water supply systems, park areas, storm drainage systems, road systems, or other facilities or services which are necessary to or desirable for the area, and which are of common use or benefit and which are not accepted for maintenance by an existing public agency, provisions shall be made by trust agreement for the proper and continuous maintenance and supervision of such facilities. A final and signed copy of the agreement shall be attached to each and every plat having a facility or service covered by such an agreement.

Section 1103. Easements

Easements shall be provided and dedicated where necessary for wires, cables, conduits, fixtures, and equipment for distribution of electric power, wastewater collectors, storm drains, overland storm water flow routes, sidewalks, pedestrian ways, bikeways, private roadways, and water mains at such locations and widths as determined by the County.

In any dedication of an easement, the County may prohibit or restrict building, fences, driveways, and other improvements; may enter for construction, reconstruction, replacement, repair, operation, and maintenance purposes; and will be held harmless for the cost of replacement or damage to any improvement or vegetation within the easement and may make any other appropriate or necessary requirements.

- A. All easements for utilities shall be shown on the plat.
- B. Lots and easements shall be arranged in such a manner as to eliminate unnecessary jogs or offsets and to facilitate the use of easements for power distribution, telephone service, drainage, water, and sewer services.
- C. The property owner whose property is subject to such easements shall be responsible for its maintenance. The property owners shall keep the easement clear of any structure, debris, trees, shrubs, or landscaping whatsoever except that lawn grass, which shall be regularly mowed, and annual vegetation may be grown thereon.

ARTICLE 12: CERTIFICATES REQUIRED

Section 1201. Certificates for Preliminary Plans

Certificates shall be attached to the preliminary plan in the following form:

COUNTY PLANNING COMMISSION APPROVAL

Approval of the preliminary plan of (Subdivision Name) Addition is hereby granted by the Lincoln County Planning Commission on this _____ day of _____, 20____.

Chair, County Planning Commission
Lincoln County, South Dakota

BOARD OF COUNTY COMMISSIONERS APPROVAL

I hereby certify that the preliminary plan of (Subdivision Name) Addition was duly submitted to the Lincoln County Board of County Commissioners, and that after due consideration the Board approved said preliminary plan at its meeting held on the _____ day of _____, 20____.

County Auditor
Lincoln County, South Dakota

Section 1202. Certificates for Plats and Replats

Certificates shall be attached to the plat or replat in the following form:

SURVEYOR'S CERTIFICATE

I, (Name), a Registered Land Surveyor of the State of South Dakota do hereby certify that I did on or before (Date), survey that parcel of land described as _____ (Legal Description)

Dated this _____ day of _____, 20____.

Registered Land Surveyor

(SEAL)

OWNER'S CERTIFICATE OF COMPLIANCE

We do hereby certify that we are the owners of all land included in the above plat and that said plat has been made at our request and in accordance with our instructions for the purposes (indicated herein), and that the development of this land shall conform to all existing applicable zoning, subdivision and erosion and sediment control regulations.

DEDICATION OF LAND FOR PUBLIC USE

We hereby dedicate to the public for public use forever, the streets, roads, alleys and parks and public grounds, if any, as shown on said plat, including all sewers, culverts, bridges, water distribution lines, sidewalks and other improvements on or under the roads, alleys, parks and public grounds, whether such improvements are shown or not. We also hereby grant easements to run with the land for water, drainage, sewer, gas, electric, telephone or other public utility lines or services under, on or over those strips of land designated hereon as easements.

OWNER'S CERTIFICATE FOR PRIVATE MAINTENANCE OF FACILITIES

We do hereby certify that ownership and maintenance of streets, roads, and alleys, parks and other open space, drainage ways and detention areas and natural or established watercourses, if any, as shown on said plat, and any improvements thereto, shall be provided by the (Name) Homeowners Association except those areas, improvements, or facilities with respect to which an offer of dedication to the public has been accepted by the appropriate public authority. We also hereby grant easements to run with the land for water, drainage, sewer, gas, electric, telephone or other public utility lines or services under, on or over those strips of land designated hereon as easements.

If private roadways are shown, include:

I further grant and certify that the roadway(s) shown as (Names or private roads) are private roadways which are hereby reserved as a permanent unobstructed access. Said roadways are for vehicular and pedestrian travel for the purpose of access to the abutting property. It is understood that the Owner, their lessees and assignees have the responsibility with respect to maintaining said private roadway. Said grant is to run with the land. As no dedication to the public is being made of said private roadways, the Owners, their lessees and assignees, of the property platted as (Name of subdivision), shall at their own cost and expense keep and preserve said private roadways at all times in a good condition of repair and maintenance, and clear of snow and other obstructions and neither erect nor permit erection of any improvements of any kind within said private roadways which might interfere in any way with the proper maintenance, use, repair, reconstruction and patrolling of said private roadways. This shall remain in effect until a public entity accepts the roadways as a public dedication.

If access easements are shown, include:

We further grant and certify that the access easement is hereby created as a perpetual common unobstructed access in favor of the lots abutting on it. The easement is for vehicular and pedestrian travel for the purpose of access to the abutting property. The owner, their lessees and assignees shall maintain the easement area. They shall, at their own expense, keep the easement area in good repair and maintenance and clear of snow and other obstructions. No improvements of any kind may be erected within the easement area which might interfere in any way with the proper maintenance, use, repair,

COUNTY AUDITOR CERTIFICATE

I do hereby certify that the above certificate of approval is true and correct including the signature thereon.

Dated this _____ day of _____, 20____.

County Auditor
Lincoln County, South Dakota

DIRECTOR OF EQUALIZATION

I, Director of Equalization of Lincoln County, South Dakota, do hereby certify that a copy of the above plat has been filed at my office.

Director of Equalization,
Lincoln County, South Dakota

COUNTY TREASURER'S CERTIFICATE

I, Treasurer of Lincoln County, South Dakota, do hereby certify that all taxes which are liens upon any land included in the above (and the foregoing) plats, as shown by the records of my office, have been fully paid.

Dated this _____ day of _____, 20____.

Treasurer of Lincoln County, South Dakota

REGISTER OF DEEDS

Filed for record this _____ day of _____, 20____, at _____ o'clock _____ .m., and recorded in Book _____ of Plats on page _____.

Register of Deeds, Lincoln County, South Dakota

ARTICLE 13: DEFINITIONS

Arterial. A principal traffic artery, more or less continuous across the County, which acts as a principal connecting road with state and federal highways and includes each road designated as an arterial street on the major street plan or as designated by the Board of County Commissioners.

Board of County Commissioners. The elected governing body of the County.

Building. Any structure having a roof, supported by columns or walls, for shelter or enclosure of persons or property.

Collector. A road which carries traffic from local roads to arterial roads and highways, including the principal entrance roads of a residential development and roads for circulation in such development.

Comprehensive Plan. An official document of the County which guides land use for development.

County. Lincoln County, South Dakota.

Covenants. Those declarations prepared by the developer and intended to be recorded along with the Plat, which may provide for restrictions and controls of land uses and development within the subdivision, and which shall including a method whereby all private roadways within the subdivision shall be improved and maintained until such time as the obligation thereof may be accepted by the County or other governmental unit.

Cul-de-sac. A local road with only one outlet having an appropriate terminal for safe and convenient reversal of traffic movement.

Dedicated. A grant of land to the public for their perpetual use.

Developer. Any person who converts undeveloped land into legally platted, buildable lots. The developer may or may not be the land owner or the builder of structures which occupy the lots.

Double Frontage. A lot which abuts a road on two opposite sides (not a corner lot).

Easement. Authorization by a property owner for the use by another, and for a specified purpose, of any designated part of the property.

Final Plan. The final plan shall be comprised of final drainage plans, grading plans and the erosion control plan, and the plat, in duly executed and recordable form.

Frontage Road. A road generally located adjacent to an arterial road, with limited access to the arterial, and used only for access to abutting property.

Highway Superintendent. The person appointed by the County Commission to direct the operations of the Highway Department.

Homeowners Association. An association or organization, whether or not incorporated, which operates under and pursuant to recorded covenants or deed restrictions through which each owner or a portion of a

subdivision—be it a lot, parcel site, unit plot, condominium, or any other interest—is automatically a member or assessment for a prorated share of expense of the association which may become a lien against the lot, parcel, unit, condominium, or other interest or member.

Local Road. A road intended to provide access to arterial and collector roads from individual lots and to provide right-of-way for various utilities, but not intended to be used for through traffic.

Lot. A tract, plot or portion of a subdivision or other parcel of land intended as a unit for the purpose, whether immediate or future, of transfer of ownership or for building development.

Major Street Plan. The street plan adopted as part of the Comprehensive Plan.

May. Permissive.

Monument. A boundary marker of concrete, permanently planted and firmly fixed in the ground placed so that the top of the monument is flush with natural ground. The monument shall be 6 inches in diameter or 6 inches square and 24 inches in depth. A steel rod, 5/8 inch x 12 inches, shall be placed at the center point on the monument.

Owner. The title holder of property, on file at the County Register of Deeds.

Person. Any individual, firm, partnership, association, corporation, organization, or other legally recognized entity.

Planning Commission. The Planning Commission as duly appointed by the Board of County Commissioners.

Planning Director. The person appointed by the Board of County Commissioners to direct the activities of the Planning Department and to administer and enforce the provisions of these regulations.

Plat. A map, or representation on paper (or, when required for recording and microfilming purposes, mylar or similar substances) of a piece of land subdivided into lots, parcels, tracts or blocks, including roads, commons, and public grounds, if any, all drawn to scale and complete with all irrevocable offers of dedication.

Preliminary Plan. The preliminary plan shall consist of the preliminary subdivision plan, and the preliminary drainage plan, grading plan, erosion control plan, and proposed covenants.

Preliminary Subdivision Plan. Drawing or drawings indicating the proposed layout of the lots, blocks, roadways, and public rights-of-way within a subdivision.

Private Street/Road. A roadway that has not been dedicated for public use, but rather reserved by platting of a lot or by a private easement. The private street or road shall be owned and maintained by the property owners which it serves. The plat shall have the owner's certificate regarding the lot's "Private Maintenance of Facilities."

Replat. A change in a map of an approved or recorded subdivision plat which affects any road layout, area reserved for public use, or lot line.

Right-of-Way. A strip of land occupied by a road, railroad, pedestrian walkway or other special use. The use of the term right-of-way for platting purposes shall mean that every right-of-way hereafter established and

shown on a final plat is to be separate and distinct from the lots or parcels adjoining such right-of-way and not included within the dimensions or area of such lots or parcels. Rights-of-way shall be dedicated to public use by the owner of the property on which such right-of-way is established.

Shall. Mandatory.

Structure. Anything constructed or erected with a fixed location on the ground, or attached to something having a fixed location on the ground, including but not limited to buildings, walls, fences and signs.

Subdivider. A person who prepares or causes to be prepared a subdivision plat.

Subdivision. The division of a parcel of land into two or more lots; or parcels ten (10) acres or less in size platted for the purpose of the transfer of ownership, or building development, whether future or immediate; or any division of land involving a new road regardless of parcel size or the number of parcels.
